 When driving into the sun remember: S unglasses-polarized ones help reduce glare U tilize your sun visor-it can help block out the sun N ot following too closely-leave following room as it can be hard to see what the car ahead is doing. 	 When driving in a dust storm, remember: D riving lights should be off U p the volume on your radio S tay off the freeway if possible; exit at a ramp T hree hundred feet visibility before driving Y ou watch out—as heavy rains may follow DB27
txdrivingconcern.org	txdrivingconcern.org
Most tire manufacturers recommend replacing your tires	Check your tires MONTHLY! In the hot summer months, the high heat and hot roadways contribute to the breakdown of tires and a greater opportunity for tire failure.

(including your spare) every 6-10 years.

greater opportunity for tire failure.

Under-inflation leads to...

- Poor fuel economy
 Sluggish handling
- Longer stopping distances
 Poor traction and braking
- Increased stress to tire components
- DB29

txdrivingconcern.org

They both give **WARNINGS** that shouldn't be ignored.

- Vehicles with an on-board diagnostics system trigger warning lights for various reasons.
- Ignoring these warnings could cause significant \checkmark damage to your vehicle, but more importantly put you, your passengers, and others around you in danger.

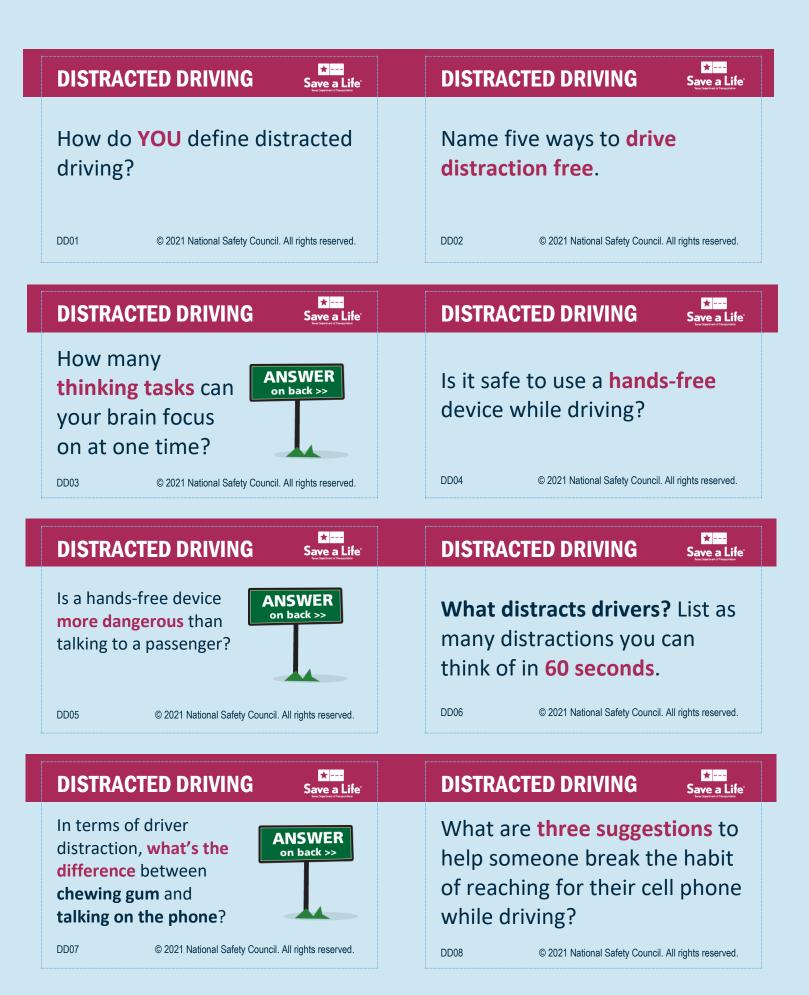

txdrivingconcern.org

The total amount of time required to check your tires' air pressure is about ten seconds a day...or five minutes each month.

Doing this can help you...

- \checkmark Avoid crashes caused by tire pressure issues such as poor traction, braking and handling
- \checkmark Save around 12 cents on each gallon of fuel-proper inflation also enhances fuel efficiency!

DB31

txdrivin	gcon	cern.org	
CAULT III	190011		

Possible answers may include:

- Use an app that shuts off phone notifications
- Pull over for a call or text
- Keep your hands on the wheel
- Avoid eating and drinking while driving
- Keep your eyes on the road

txdrivingconcern.org

Set your radio and GPS before driving

DD02

txdrivingconcern.org

txdrivingconcern.org

DISTRACTION occurs any time you take your **eyes off the road**, your **hands off the wheel**, and your **mind off your primary task**: driving safely. • Any non-driving activity you engage in is a potential distraction and increases your risk of crashing.

DD01

The answer is NO. Portable and vehicle- integrated hands-free cell phone use still involves visual-manual subtasks, which are associated with a greater crash risk, and can cause drivers to miss the important visual and audio cues that would ordinarily help avoid a crash.	The answer is – ONE. If your brain has more than one thinking task to choose from, it gets overwhelmed and filters information out. When people attempt to perform two complex tasks such as driving and talking on a phone, the brain shifts its focus and drivers develop "inattention blindness" – or "looking" but not "seeing" .		
txdrivingconcern.org	txdrivingconcern.org		
 Driving distractions include: Texting • Electronic devices • Tuning radio Reaching for items • Eating and drinking Talking on cell (hands-free or handheld) Reading, including maps Applying makeup or grooming Dealing with children or pets in the car 	 Most of the time, a passenger Gives non-verbal cues. Without those cues, a cell phone conversation takes more focus. Sees your driving environment and can adjust the conversation based on risks. Serves as a lookout for hazards (like a co-pilot). As a result, passengers can actually reduce the crash risk. DD05 		
txdrivingconcern.org	txdrivingconcern.org		
 Turn off your cell phone when you enter the car Place the phone out of reach (ex: trunk) Put your phone on silent or vibrate Have your outgoing message state you are a "cell phone-free driver" Let someone else drive if you need to make a call DD08 	Chewing gum is not demanding on your brain! You don't have to think about it! You can't do more than ONE thinking task at a time and do it safely or well. Thinking tasks include: Driving, Texting, Listening, Speaking, Reading, and Gaming. DD07

txdrivingconcern.org	txdrivingconcern.org
 Be familiar with the controls in your vehicle, especially when in a car that's not yours. Adjust vehicle controls such as mirrors, seat, radio, heat or air conditioning. Plan ahead. Read maps and check traffic conditions. Pre-program directions into your navigation system. 	 Organize your route and schedule so you can make phone calls from one place before traveling to the next. Establish regular times when callers can contact you and when you will return calls. Set up a special ring for one contact who will call in an emergency work situation – leave the road and park to return the call.
DD10	DD09

txdrivingconcern.org	txdrivingconcern.org
 Approach with care; warn others you are slowing. Use pull-out lane if available. Prepare to stop—roll down windows and turn off noise. Stop at least 15' but not more than 50' from nearest rail. Look and listen both ways carefully, and bend forward to see around mirrors and A-pillars. Make sure you can drive fully through, and the back of your vehicle will have at least 3' of clearance from furthest rail. If in a pull-out lane: signal, watch for safe gap, re-enter road. Use highest gear that will let you cross without shifting. Keep going once you start even if crossing lights start to flash. TR08 	 Twenty-three seconds is the average time your eyes are off the road while texting. Texting while driving can more than double your chances of a crash or a near-crash. In a recent year, 3,179 people were killed and 431,000 were injured in distracted driving crashesare those 23 seconds worth the risk?

Impairment starts with the first drink. Even one drink of alcohol can affect a person's ability to operate a motor vehicle.

txdrivingconcern.org

TRUE.

"Buzzed" is impaired.

If you feel different, you drive different. Buzzed driving, impaired driving, or driving under the influence all describe drivers who lack the necessary awareness to avoid crashes. ID01

ID02

txdrivingconcern.org

txdrivingconcern.org

Drowsy-driving factors may include:

- Sleep loss (chronic or acute)
- ✓ Sleep-restrictive work patterns (e.g., night shifts, overtime, rotating shifts)
- ✓ Change in driving patterns (ex: time of day or amount of time spent driving)
- Use of sedating medications or alcohol
- Untreated sleep disorders

DRD02

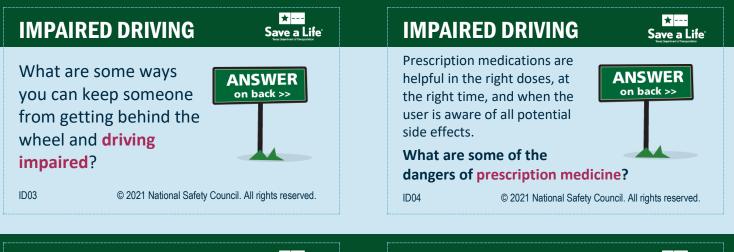

txdrivingconcern.org Stop driving. Pull in to a rest stop and sleep! Safely pull over, turn on your hazard lights, nap for 15 to 20 minutes, and then proceed to the nearest exit or rest stop to more fully rest.

✓ Napping + consuming caffeine equivalent to two cups of coffee can keep you alert enough get you to a place to rest.

txdrivingconcern.org

Drowsy-driving crashes more often take place on highways and major roadways with speed limits of 55 to 65 mph.

Fall-asleep crashes are likely to be serious.

The majority of drowsy-driving crashes involve drivers alone in the vehicle.

DRD04

txdrivingconcern.org

Drowsy driving warning signs may include:

- You can't stop yawning.
- ✓ Your eyes close, blink frequently, or have trouble focusing.
- ✓ Your mind wanders; disconnected thoughts. You can't remember the last few miles.
- ✓ Your **driving** becomes **sloppy**.
- ✓ You hit rumble strips or grooves in the road.

DRD03

txdrivingconcern.org	txdrivingconcern.org
 Activities that won't help: Turning the volume up on the radio. Singing loudly Chewing gum or eating Getting out and running around Slapping yourself Sticking your head out the window 	 Get good sleep—create a quiet, cool, dark environment, allow sufficient time, and try to sleep during the same hours each day. Avoid driving home from work while sleepy. Get a ride from a family member, take a cab. Nap before heading home. Consume caffeine (= two cups of coffee) to help improve alertness for a short period. DRD05

txdrivingconcern.org

- Dependency and then addiction can occur, especially to pain medication.
- It may be the person who holds the prescription, or someone who is stealing the medication for recreational use.
- Potential overdoses are a risk associated with any prescription medication.
- From 1999 to 2014, the number of unintentional prescription deaths rose by 351%.

Save a Life

txdrivingconcern.org	::	txdrivingconcern.org
A collision while driving at 60 mph without wearing your seat belt would have the same impact as if you fell from 12-story building . AND a 40-mph collision has the same impact as if falling from a 6-story-buidir PR02		In fatal crashes, pickups roll over almost twice as often as passenger cars. But if a truck should roll over during a crash, your survival rate will increase if you're wearing a seat belt .

txdrivingconcern.org	txdrivingconcern.org	
Everyone moves in the direction of impact until stopped by the inside surface of the vehicle. • Organs get jarred. Solid organs like the spleen and the liver fracture and bleed. • Hollow organs like the stomach rupture. • Vessels like the aorta tear. • Lungs rupture or become punctured. • Seat belts PROTECT the driver and passengers from the powerful forward moving forces and the three crashes that occur in any collision. PR04	 Seat belts Protect drivers and passengers by helping absorb the force of a crash. Keep occupants from being ejected in a crash frequent cause of death). Hold the driver in place so he or she can bett control the vehicle. Increase the odds of surviving a serious crash PR03 	er

txdrivingconcern.org	txdrivingconcern.org
Buckle up every seat, every time! Drivers and passengers who buckle up are 45% less likely to die and 50% less likely to be moderately injured in a motor vehicle crash.	Seat belts are the least expensive and most effective way to save lives and reduce the severity of injuries.
txdrivingconcern.org	txdrivingconcern.org
George should ask his car dealer for assistance if the seat belt does not fit properly.	You can tell Alessandro: "Air bags are designed to work with seat belts—not replace them! As a driver, I need you buckled up to ride with me. It is non-

negotiable."

"If I see someone driving aggressively, shouldn't I speed up to get away from their vehicle?" Talk over this statement. What do you think? AG06 © 2021 National Safety Council. All rights reserved. 	
DRIVING BASICS Save a Life	DRIVING BASICS	
Which vehicle has the right of way in a four-way intersection if the traffic signals are not working?	What safety tips should you remember when approaching a railway crossing?	

txdrivingconcern.org	::	txdrivingconcern.org	
 Aggressive driving behaviors can include: Speeding • Drag racing on public streets Frequent and unnecessary lane changes Tailgating • Running red or yellow lights Cutting off other drivers Angry gesturing or yelling at other drivers Ignoring posted traffic signs or barriers AG02 		 There is a difference. Aggressive driving is a traffic offense; road rage is a criminal offense. Road rage is characterized by willful and wanton disregard for the safety of others. Road rage is an assault with a motor vehicle or weapon precipitated by an incident on a roadway. AG01 	
txdrivingconcern.org	::	txdrivingconcern.org	
All of these are actual excuses of by people who killed others in roa rage incidents, and are document news stories of specific road-rage incidents.	ad- ted in	 Answer: TRUE In at least 29 states, slower traffic is expected to keep right (and many drivers treat this as an "unwritten rule" of the road), except for emergency vehicles. Speeding is a contributing factor in nearly 27% of all fatal crashes. 	
txdrivingconcern.org	::	txdrivingconcern.org	
 It is true that you should put as much distance as you can between yourself a aggressive driver or a driver you think impaired. However, you shouldn't put yourself at additional risk by speeding. Pull over, turn right or take the next exkeep out of harm's way. 	may be t	 First, make every attempt to get out of the aggressive driver's way. Put your pride in the back seat. Do not challenge them by speeding up or attempting to hold-your-own in your travel lane. Avoid eye contact. 	
txdrivingconcern.org	::	txdrivingconcern.org	
 Reduce speed when approaching crossings and look both ways. Turn down your stereo and listen for a t If red lights are flashing or if crossing are been lowered, stop. Never stop on the tracks. 		 Four-Way Intersection without signals (or when signals aren't working): ✓ The first driver who arrives gets to go first. If you "tie" with someone, it is safest to yield to the driver on your right. Be 	

- ✓ Never stop on the tracks.
- ✓ Be sure ALL tracks are clear before crossing there may be more than one set of tracks. DB02

txdrivingconcern.org	txdrivingconcern.org
 In normal driving conditions, it takes about 1.5 seconds to notice a potential risk and 1.5 seconds to react. Wait for the vehicle ahead of you to pass a fixed object (road sign, tree, etc.) then start counting "1,001, 1,002, 1,003". If you reach that same object <i>before</i> three seconds—you're too close! In an SUV: distance should be at least five seconds. In commercial vehicle or in adverse conditions: following distance should be at least six seconds. DB12 	Two things to do immediately when weather affects road conditions are: ✓ reduce your speed and ✓ increase your following distance.
txdrivingconcern.org	txdrivingconcern.org

ANSWER: If someone tailgates you, move into another lane and let the tailgater pass. Or, pull off the road so the person can pass. Avoid speeding up or slowing down.

Most of all—don't take it personally! Keep calm.

ANSWER: It is unsafe and can be illegal to pass

✓ your line-of-sight is restricted or limited (e.g., a

✓ a solid yellow line is on your side of the roadway.

✓ a school bus is loading or unloading children.

DB14

DB16

DB18

They both need SPACE. Maintain SPACE around your vehicle. Remember:

- ✓ Use the three-second-rule to keep space between you and the vehicle ahead.
- Don't drive parallel with another vehicle. (Leave room on both sides of your car to escape potential obstacles.)
- Let tailgaters pass you.

DB13

txdrivingconcern.org

ANSWER: Look!

Look ahead: As you drive, look four or five vehicles in front of you. This helps you anticipate stops, slowdowns, curves or other changes coming in the traffic or roadway.

Look behind: Check your rearview mirrors approximately every ten seconds. This helps you anticipate hazards approaching from behind. DB15

txdrivingconcern.org

txdrivingconcern.org

curve, hill or weather conditions).

another vehicle when:

✓ cross-traffic is present.

Check to make sure the path to the rear and sides is clear **BEFORE getting in the car** (especially of small children and objects). Check all blind spots carefully.

Keep your foot firmly on the brake pedal while shifting to reverse. **Back up slowly** and be prepared to stop quickly.

Look in the direction you are moving. Remember, the rear of the vehicle turns in the direction you turn the steering wheel when backing up. If you become confused or disoriented, **stop and begin again**.

txdrivingconcern.org

ANSWER: When passing another vehicle:

- Scan for hazards, e.g., oncoming, merging, and/or vehicles approaching from rear
- Check for blind spots and signal your intention
- Accelerate to appropriate speed into passing lane
- Concentrate on the path ahead
- Check the mirror for following cars
- Cancel turn signal after passing

PEDESTRIAN SAFETY TIPS

- Always cross at intersections and crosswalks.
- Look for traffic when stepping off a bus or from behind parked cars.
- As a passenger, get in or out of a car on the curb side of the street.

Be on the lookout for cyclists on the highway,

possible and give them plenty of room.

Watch for riders who may need to maneuver

✓ If you're passing a bicyclist, move to another lane if

- ✓ Make eye contact with drivers before you cross the street.
- ✓ Don't text or talk while walking!

txdrivingconcern.org

especially at intersections.

around potholes and debris.

Never drive in a bike lane.

TIPS FOR DRIVERS

DB19

DB21

DB20

txdrivingconcern.org

Answer: TRUE!

As a bicyclist, obey all traffic laws, including:

- Stop at red lights and stop signs
- Pay attention to lane markers
- Ride near the curb, traveling in the same direction as traffic
- Use a light on the front and a red reflector or red light on the back of your bike while riding at night

DB22

txdrivingconcern.org

To parallel park in a space on your RIGHT:

Find a spot roughly **6 feet longer** than your car. • **Pull up three feet away** from side of car you'll park behind and align your back tires with the other car's back bumper. **STOP**. • Keep foot **on** or **near** brake pedal. The gas is not needed. • **Put your turn signal on** and check your blind spots. • Put car into reverse. Turn wheels **ALL THE WAY** to the right. • Carefully back up until you are at a 45-degree angle, and **STOP**. • Turn your wheels **ALL THE WAY** to the left. • Back up slowly until you are parallel with the curb. DB24

txdrivingconcern.org

UPHILL: Turn your front tires away from the curb, and let your vehicle roll back slowly until the rear part of the front tire rests against the curb.

DOWNHILL: Turn your front tires toward the curb, and let your vehicle roll forward slowly until the front tire rests against the curb.

IF THERE IS NO CURB PRESENT, still turn your tires as stated above, so that if your vehicle moves for some reason, it will roll away from traffic. DB23

txdrivingconcern.org

- SLOW DOWN. Always follow posted WORK ZONE SPEED LIMITS. Speeding is one of the major causes of work zone crashes.
- PAY ATTENTION. Workers and heavy equipment may be only a few feet from passing vehicles.
- ✓ BE PATIENT. Delays can be frustrating. It only takes a few extra minutes to slow down for a work zone.
- PLAN AHEAD. Leave a few minutes early when traveling through a work zone to reach your destination on time.

DB26

txdrivingconcern.org

TRUE.

Mobile and moving work zones include line painting, road patching, or mowing. Just because you do not see workers immediately after you see a **Work Zone** sign does *not* mean they are not out there. Observe the posted signs until you see one that says **End Road Work.**

AGGRESSIVE DRIVING	TRUCK SAFETY	Save a Life Not instruct of response
 Which of the following are ways that speeding can influence a crash? The faster you drive Increases the distance it takes to stop your vehicle. Reduces the ability of seat belts, air bags, guardrails, and barriers to protect vehicle occupants in a crash. Increases crash severity. 		on back >>

txdrivingconcern.org	txdrivingconcern.org
ANSWER: YOU! If you can't see the driver in the truck's side mirror, you are following too close. The driver can't see you or your vehicle. It also obscures your view of the road in front of you. Avoid traveling alongside or close behind a truck . TR01	 ANSWER: ALL of these are true. Speeding increases the distance it takes to stop. Crash severity increases as speed increases. If you accelerate from 40 to 60 miles an hour, your speed increases 50 percent while the energy released in a crash more than doubles, reducing the effectiveness of seat belts and airbags. AG07
txdrivingconcern.org	txdrivingconcern.org

txdrivingconcern.org **ANSWER:** Large trucks and truck-tractor

combinations can weigh as much as 80,000 pounds. (That's 40 tons.)

- Because of this, they require more acceleration and deceleration time than an average passenger vehicle and can have blind spots in multiple locations.
- Always take extra care to share the road responsibly with large trucks!

TR03

ANSWER: Both can create WIND!

Because of their size, large trucks create wind currents that can affect nearby vehicles. These currents can threaten your vehicle's stability when you are close. This is an even greater driving challenge when you are riding a motorcycle, towing a trailer or other object, or traveling on slick roadways. Be sure to allow plenty of clearance between your vehicle and large trucks. **TR02**

txdrivingconcern.org

ANSWER:

Large trucks and the trailers they pull do not have impact-absorbing bumpers.

Additionally, the truck's metal bumpers may not align with those of your car. A severe collision can result when a car hits the rear end of a truck.

txdrivingconcern.org

ANSWER:

- Always leave at least four car lengths between the back of your car and the front of any large truck you pass (more if driving in adverse conditions).
- Make sure the entire truck appears in your rearview mirror before returning to the lane.
- ✓ Never cut in front of a truck.
- **TR04**

TR05

txdrivingconcern.org

ANSWER:

- Bobtailing is a term used when a truck is driving without the trailer attached.
- Trucks handle very differently when bobtailing, \checkmark often making them more dangerous, especially in wet weather.
- Whether or not a truck is hauling a trailer, always \checkmark use caution when driving near big rigs.

TR07

txdrivingconcern.org

ANSWER: 4

- There are four large blind spots where cars disappear from a truck driver's view. They extend far beyond the right and left lanes as well as the rear and front of the truck.
- ✓ These "No Zones" are danger areas around large trucks in which crashes are more likely to occur. If the passenger car can't see the truck's mirrors, the trucker can't see car.
- Passenger car drivers should avoid lingering in these areas whenever possible. Stay out of the "No Zone"!

TR06

DRIVING BASICS	Save a Life Save a Life	DRIVING BASICS	
Check engine light may have to CAP I		Don't be a DRIP ! What can happen to your car if you ignore a drip?	ANSWER on back >>

txdrivingconcern.org	txdrivingconcern.org
 Drips may be caused by leaks which can lead to low fluid levels. Low fluid levels may affect the efficiency and performance of your vehicle. If the engine fluids run low or become empty, the damage to your vehicle may be irreparable. The engine could dry up and cause the entire vehicle to overheat, putting your safety at risk. DB34 	 Too much emissions trigger your vehicle's check engine light. A properly fitting gas cap can save you money at the pumpand save the environment by avoiding excess evaporative emissions!

txdrivingconcern.org	txdrivingconcern.org
Be sure to	Be on the lookout for tires with
 Slow down and be prepared to stop when turning or otherwise entering a crosswalk. Yield to pedestrians in crosswalks and stop well back from the crosswalk to give other vehicles an opportunity to see the crossing pedestrians so they can stop too. 	 Worn spots, cracks, or cuts exposing the ply or cord through the tread. Visible bumps, bulges, or knots due to tread or sidewall separation. Worn tread with 1/16" or less of design depth remaining.

✓ Never pass vehicles stopped at a crosswalk. DB36

txdrivingconcern.org

NO X-RAY VISION IS NEEDED!

Marked pedestrian crosswalks are obvious with painted lines or other markings, signs, or signals on the surface...and can be midblock or at intersections. UNMARKED CROSSWALKS do not have these markings. An intersection with cross-streets that have SIDEWALKS are considered unmarked crosswalks—the sidewalk crossing "continues" across the road. (Unless there is a nopedestrian sign posted.) DB38

txdrivingconcern.org

In most states, vehicles should **YIELD** the right-of-way to any pedestrians who are:

Tread wear indicators in contact with the road.

- In their same half of the road as a marked/unmarked crosswalk, or
- Close enough from the opposite side of the road to be in danger, or
- Approaching on a sidewalk as the vehicle is emerging from any alley, building, private road, or driveway.

DB37

DB35

txdrivingconcern.org

We hope you said OIL CHANGE as an answer!

- Change your oil and filters as recommended by your vehicle's manufacturer to help your vehicle operate efficiently and increase its odds of passing an emission test.
- It is also important to use the type of oil and fuel recommended by the manufacturer for best performance.

txdrivingconcern.org

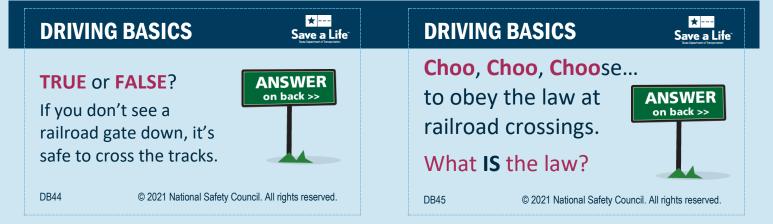

Drivers entering a highway or freeway should...

- Yield to vehicles already driving—otherwise a collision may occur.
- A driver may yield to avoid a potential collision, but it is the merging driver's duty to slow or come to a stop until it is safe to merge.

This is also true when changing lanes—the merging vehicle should yield to those already in the lane.

car on the tracks, you're rig —about a mile after they h	<mark>it you.</mark> ious matter.	Racing a train	

txdrivingconcern.org

Answer: FACT

Kids depend on motorists to know the law and drive safely around school buses. As a motorist, you should ...

- ✓ Obey the posted speed limit. (Fines INCREASE in school zones.)
- Keep an eye on children gathered at bus stops.
- ✓ Watch for children who might dart across the street to catch the bus.
- Stay off your cell phone...avoid distracted driving. DB41

txdrivingconcern.org

Answer: FALSE

Obey the school bus laws in your State!

- Stop for flashing red lights and extended "stop arms" on a school bus, regardless of which direction you're headed (some states have exceptions of multi-lane divided highways).
- Continue your trip once the bus has moved, the flashing lights stop, or the bus driver signals to pass.

DB48

	txdrivingconcern.org	::
Always stop for trains Trains	At a railroad crossing, always remember to	

Always stop for trains. Trains can't stop for you.

The U.S. Railroad system has 830 railroads, 134,000 miles of tracks, and 216,000 railroad crossings.

In 2016 there were 2,041 railroad crossing incidents in the U.S.—including **260 fatalities**. DB43

Slow down and look both ways.

- Turn down your stereo and listen for a train.
- STOP if red lights are flashing.

txdrivingconcern.org

- STOP if crossing arms have been lowered.
- Check all tracks are clear both ways before crossing—there may be more than one set of tracks.
- Check if there's room on the other side of the tracks.
- ✓ Never stop on the tracks. Never race a train.

DB42

txdrivingconcern.org

Remember motorists are required to yield the right of way to trains.

It is ILLEGAL to ...

- Cross tracks if a train is visible.
- Drive around gates that have been lowered. If the gates are down and no train is coming...THE **ROAD IS CLOSED!**

Answer: FALSE

While many of us recognize a crossing with gates and bells, there are many railroad crossings that don't have these warning devices.

- ✓ Just over one half of all public crossings in the U.S. are active (with gates, bells, and/or flashing lights).
- Just under half are passive (with signs and markings, but no active warning devices).

 Always expect a train on any track at any time. **DB44**

txdrivingconcern.org

- **DO** cross at marked crosswalks and unmarked crosswalks (intersections with sidewalks)
- DO yield the right-of-way if you're outside of a crosswalk
- ✓ **DO** stay on the right-hand side of a crosswalk
- ✓ **DO** use the sidewalk
- ✓ **DO** be alert when crossing any roadway
- DON'T enter a crosswalk into the path of a moving vehicle that is so close the vehicle is unable to yield
- \checkmark DON'T cross at an intersection diagonally unless so authorized by a traffic control device

DB47

DB45

txdrivingconcern.org

If your vehicle stalls on train tracks:

- ✓ **GET OUT** immediately.
- ✓ MOVE AWAY. Walk toward an oncoming train, and away from the tracks at a 45-degree angle-debris from a collision spreads in the direction the train is moving.
- ✓ CALL FOR HELP! Call the railroad's emergency phone number, the local police, or 911. Tell them a vehicle is on the tracks. Provide the location, crossing number (if posted), and the name of the road or highway.

HC13 © 2021 National Safety Council. All rights reserved.	 The most dangerous time to be a pedestrian is: a. From 6 to 8 a.m., when everyone's groggy and still waking up b. Noon to 2 p.m., the busy lunch hours c. 6 p.m. to midnight HC14 © 2021 National Safety Council. All rights reserved.
DISTRACTION & PEDESTRIANS Save a Life	DISTRACTION & PEDESTRIANS Save a Life

txdrivingconcern.org	txdrivingconcern.org
Answer: FALSE It may seem like you are snooping, but look, look, and look as you walk. Pay attention to help ensure that unattended children are not left in a vehicle.	Answer: FALSE Parking lots are riskier than you may think. The National Safety Council found that, on average, at least 60,000 are injured and 500 or more die in the 50,000 plus crashes in parking lots and garages every year.
txdrivingconcern.org	txdrivingconcern.org

Answer: FALSE

Walking while distracted is a growing cause of pedestrian fatalities. **It's up to pedestrians and drivers both** to be watchful and alert in parking lots, at intersections, and on roadways.

Do not be a distracted walker OR a distracted driver.

Answer: TRUE

Multiple scientific studies prove that your brain **cannot** perform two mentally demanding tasks *at the same time*. Rather, your brain does what's called "**switch-tasking**"—which can cause distraction. Distraction can be deadly in a parking lot with pedestrians walking around.

HC11

txdrivingconcern.orgtxdrivingconcern.orgAnswer: cThe hours of 6 p.m. to midnight were the
most dangerous times for pedestrians, and
this has gotten steadily worse in recent
years. (NHTSA FARS data)• Place an item you will need at your
destination in the back seat. This will
reinforce your need to look in the back seat.

HC14

Make sure the item you've placed in the back seat is secure so that it will not become a dangerous projectile in the event of a crash! HC13

txdrivingconcern.org	txdrivingconcern.org
Answer: TRUE Researchers found that hybrid vehicles are 20% more likely to hit pedestrians. There is a very simple explanation for this: A pedestrian can't hear a hybrid car coming— they are very quiet-running vehicles.	 Answer: FALSE Only 26% of pedestrian fatalities occurred at intersections. Most pedestrian deaths occur in urban areas, at non-intersection locations. On average, more than 50,000 crashes occur in parking lots and parking garages annually, resulting in 500 or more deaths and more than 60,000 injuries. HC15
